Sub.: Third Year Project Review Schedule (01.04.2026 to 03.04.2026) - Reg.

As per the project plan, the Third Year Project Review is scheduled from 01.04.2026 to 03.04.2026, which also includes mini project reviews for select departments. All departments are requested to make necessary arrangements and ensure the review is conducted smoothly and effectively.

To establish a structured IP ecosystem, patent publication is made mandatory for all project batches of third year. All patent applications will be submitted under the KAPILA Scheme (Kalam Program for IP Literacy and Awareness) to avail financial assistance for patent filing.

As per our academic plan, the expected outcomes of the third year projects include Solutions to Smart India Hackathon problems, Product development and Patent publication. Departments are advised to guide students accordingly to achieve these outcomes.

In connection with this, an orientation program on "Intellectual Property Rights (IPR) and Patent Drafting" will be conducted in the middle of April for faculty members.

All are requested to extend their cooperation in this regard.
